

ASF 650 Trough Bollard

Materials

Trough is manufactured from mild steel plate, finished galvanised. ASF can fit any bollard into a trough system - steel, stainless steel, cast iron, cast aluminium or recycled plastic.

Finish

ASF 650 bollards can be supplied with any finish.

Dimensions

Manufactured to customer specifications.

Optional Extras

Bollards can be adapted to take chains to create a temporary barrier. Bollards can be manufactured to meet DDA guidelines and/or be fitted with retro reflective bands

Embellishments

Rings and bollard features can be picked out in contrasting colours.

Lettering/Logos/Designs

Bollards can be adorned with coat of arms, logos, signs or lettering. These can be laser profiled, vinyl applied or cast depending on bollard type.
