Bespoke Options:

Manufactured in 275 carbon steel from recycled sources

Manufactured in 50mm x 30mm rectangular section steel. Other sizes available on request

Bollards are manufactured either 1200mm long (900mm above ground) or 1500mm long (1000mm above ground) All other bollard sizes are available if required

As standard ASF Steel Bollards are finished hot dip galvanised

Bollards can be polyester powder coated, nylon coated or wet painted

Retro reflective self-adhesive visibility bands can be applied. Wet painted and powder coated bands are also available

Bollards can be manufactured to base plate fix, or be adapted to accept chains, rails or panels. Bollards can be made to be removable, or to fold down onto the ground or into a trough. Bollards can be adapted to make cycle stands, barriers etc. Door stoppers or door catches can be added.
