

security bollards

Practical, Simple, Excellent Access Control, Long Lasting, Strong.

ASF offer two designs – ASF 650 and ASF 651 – which solve the problem of access control and yet leave the area unobstructed when required as they both close down below the ground.

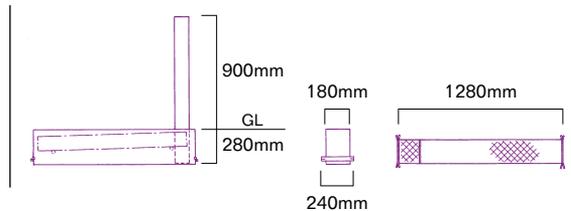

They are also suitable for Car Park Protection and defending Door and Shop Fronts.

The ASF 650 has the advantage of a shallow installation depth and can also be chain linked.
