

Section View of Tree grill joint

Stainless steel, black coated specialist cable tie fitted tightly and flat against tree grill sections.

## Anti Theft Device | Cast Iron Tree Grilles

### Information:

These specialist cable ties are designed for demanding industries such as mass transit, ship building, oil rigs and mining. They are manufactured in Grade 316 Stainless Steel and black powder coated to blend in with our tree grilles. Each tie has a tensile strength of 45kg. If fitted flat and tightly with the tree grilles they act as an excellent, unobtrusive method of preventing unauthorised removal. four per tree grill recommended.
